

Potential Specialty FFF Materials

- Nylon
- Conductive PLA
- Magnetic Iron PLA
- Stainless Steel PLA
- Stainless Steel PLA
- Flexible Plastic
- Laywood
(Wood filled filament that produces a wood like appearance.)
- Laybrick
(Mineral enhanced filament that produces a stone like appearance.)
- n-vent
(Premium polyester. Combines strength and dimensional accuracy.)
- t-glase
(High strength transparent PET polymer. Simulates clear plastic & glass.)
- Semi-Flexible Plastic
